

ZANZIBAR
WHITE SAND
LUXURY VILLAS & SPA

**SUSTAINABLE
RESORT**

Our commitment to clean
tourism, respect of the
landscape and community.

RESPONSIBLE TOURISM

OUR VALUES

Designed with sustainability in mind, Zanzibar White Sand Luxury Villas & Spa reflects the natural beauty of the coast of Zanzibar. With over 4 hectares of lush garden, the 11 villas are nestled among trees and bushes for complete intimacy, their architecture emphasizing the local environment through the use of organic materials, shapes and textures.

Behind the scenes, our operations reiterate our commitment to sustainability through powerful infrastructures and initiatives.

WIND & SOLAR ENERGY

We have invested in photovoltaic panels, solar water heaters and our own wind turbine to power the resort sustainably, with a minimal imprint.

ORGANIC GARDENS

With over 20.000 plants in our care, the lush gardens of the resort are without a doubt one of our most precious gem. We cultivate our organic fruits, herbs and vegetables that are used in our kitchen.

PLASTIC-CONSCIOUS

Our drinking water is filtered through our water desalination plant to minimize the use of plastic on the resort and we have banned plastic straws as well as plastic packaging in our amenities.

INITIATIVES

From carpentry training to beach cleanups, we drive and promote green and community initiatives in Zanzibar.
